

# BENTELER ROTOR SHAFT

## FROM OUR TUBE TO YOUR ROTOR SHAFT

We offer steel, tube production and forming from a single source. This enables fast and targeted adaptations to your specific requirements. We support you right from the development process to find the optimum solution for your rotor shaft.

## YOUR BENEFITS

- » Professional technical support in the selection of individual tube solutions for your projects and needs
- » Material and forming simulation according to specific requirements
- » Resource and time savings thanks to fewer iteration loops
- » Use of higher-strength steels and heat treatments for an even slimmer shaft design
- » In-process material testing and mechanical-technological properties beyond the standard
- » Green tube solutions reduce the CO<sub>2</sub> footprint of your rotor shaft and improve your carbon balance
