

glasstec 2024: BENTELER Glass Processing Equipment presents innovative glass processing solutions

- **From October 22 to 25, 2024, BENTELER Glass Processing Equipment will present three different glass processing systems in Hall 14 at Stand A58.**
- **Automation and networking of the systems improve handling and ensure the highest processing quality.**
- **Customer-oriented solutions and technological innovation are top priorities at BENTELER.**

Salzburg, October 16, 2024. October 22 marks the beginning of glasstec 2024, the world's leading trade fair for the glass industry, in Düsseldorf. BENTELER Glass Processing Equipment will present its latest developments in glass processing, which offer maximum precision, efficiency, and flexibility on Stand A58, Hall 14 through to October 25.

The focus of this year's exhibition will be on three machines: The tecDriller HD Pro portal drilling machine, the tecGrinder double-edging grinding machine, and the tecWasher F glass washing machine. "These machines embody BENTELER's commitment to technological excellence and customer-oriented solutions," says Peter Oswald, Managing Director of BENTELER Glass Processing Equipment. "For the European market, we produce at our headquarters in Bielefeld and our special machinery and washing machine manufacturing site in Liberec, North Bohemia, Czech Republic. In the Chinese market, we follow a 'local for local' approach, allowing us to produce systems and machines locally in China, directly tailored to the production requirements there."

Decades of experience in architectural and automotive glass, as well as technical glass

BENTELER Glass Processing Equipment specializes in producing glass processing machines and complete production lines and is part of the global BENTELER Group. Christoph Linnenbrügger, Technical Director at BENTELER Glass Processing Equipment, says, "We develop fully automated and modular production lines for architectural and automotive glass, as well as technical glass. For decades, BENTELER has focused on innovative control and drive concepts. Through networking, automation, and smart glass flow management, we consistently improve the handling of the systems and increase productivity."

Market leadership and innovation

BENTELER Glass Processing Equipment is an international market leader in glass processing with its innovative products:

C-edge grinding machine Generation II: This patented and highly automated grinding machine is characterized by very high availability as well as low maintenance and operating costs. The machine impresses with its excellent operational safety at high grinding speeds.

Grinding, drilling, and washing lines: BENTELER is one of the world's leading single-source providers of complex processing lines. The combination of grinding, drilling, and washing machines to form a complete processing line ensures optimized glass flow and short processing times.

Laminated glass lines: BENTELER offers the right solution for every requirement in laminated glass production, from manual to fully automated laminating lines for all common types of films, such as PVB, EVA, or SentryGlass® (by DuPont). With years of experience and continuous product development, BENTELER offers energy-optimized laminated glass lines that are state-of-the-art.

Visit us at glasstec 2024

BENTELER Glass Processing Equipment invites all interested parties to experience the latest innovations live. Visit us from October 22 to 25 on Stand A58 in Hall 14 at glasstec 2024 in Düsseldorf.
